Chevy Chase, MD, 20815

## STATEMENT:

Full-stack web developer and former professional video producer. An adept problem solver who is extremely focused, organized, and goal-oriented. A “maker” at heart who strives for better efficiency and ease of use, but also finds great joy in the process.

## SKILLS:

- Javascript
- jQuery
- React.js
- Socket.io
- Node.js
- Express.js
- Axios
- MongoDB
- Mongoose
- Ruby on Rails
- PostgreSQL

## SOFTWARE:

- Photoshop
- Illustrator
- After Effects
- Audition
- Premiere

## EXPERIENCE:

### GENERAL ASSEMBLY DC:

Aug 2017 - Nov 2017

#### Web Development Immersive Student :

Completed 3 individual projects, 5 labs, and 1 group project on both front-end and back-end technologies. Projects included:

- An online dog-daycare scheduling app for both owners and employees. Built on Rails and PostgreSQL, and demonstrated understanding of complex relational data tables.
- A real-time chat/game single-page webapp, utilizing a MERN stack and WebSocket technology so players can chat and play in real-time over the internet.

### NEW HOUSE CREATIVE STUDIOS :

Sept 2014 - April 2017

#### Video Producer and Founder :

Managed client acquisition, and provided video branding and marketing strategies for over 35+ clients, working with their internal teams or individually.

Organized pre-production logistics including scheduling, resources, talent, scripts, and locations. Led the overall project and business management, including equipment, rentals, and budgeting.

Highly skilled in professional level production. Technical expertise and craftsmanship in video and audio production, as well as post-production. Accolades include imdb Cinematographer credit for decorated short film “Shaded Reflections”.
